Matt –

It sounds like another meeting is warranted on our end. How does next Thursday at 2pm work for all involved?

If that doesn't work, please advise of another day and time.

Thanks

Jennifer

Good afternoon Jennifer,

We are in the process of applying for the DEP permits for the dredging and it requires a plan for dredge spoils transportation to the proposed site. Can we come to an agreement in the near future on the use of the pier to offload to trucks? Should we meet again to go over details and requirements of the permits and or also any terms you may have to include fees? Was there anything that I forgot to get back to you on? I know you were going to check into the need of any dredging at your pier, wasn't sure if you have made that determination yet or not. Thoughts?

Thanks,

Matt

Follow the signs toward the main office. There will be a large white sign at the point you'll need to take a right to the main office. Follow that road past the operating plant to the square concrete building at the end of the drive. That is the main office.

If you have any trouble figuring out where you need to be, just call my office or cell and I'll come find you or direct you.

We'll see you Monday after next!

-Jennifer

Great, 03 April at 1:30 at your plant looks good, where exactly do I report to when I get there?

Matt –

Would April 3rd (or 4th) at 1:30 work for you to meet us here at the plant? I've Cc'd both our Environmental Manager (Mike Martunas) and the Plant Manager (Ray DeGrass) as those are the two individuals in addition to me that will be involved on this end. Both of these days are clear for all of us presently.

We'd set something up sooner, but we are all expecting to be fairly occupied next week with a technical visit from our parent company.

Let us know which day works best and we'll put in on the calendar. Thanks!

That would be great, you name the date, place, and time and we will be there.

Thanks,

Matt

Good morning Matt. Sorry for the delay in getting back to you.

Would you be open to meeting with us, either here at our location or at yours? I'd like to get both the Plant Manager and our Environmental Manager involved in the initial dialogue so that we're all working from the same information set. It sounds like an interesting project that we can potentially help with.

Thanks in advance and look forward to setting something up with you.

Regards,

Jennifer L. Small

Subject: Dredging

Good morning Jennifer,

I would like to touch base with you on our proposed dredging project at the fish pier and the possibility of using your dock on the south end to transfer the dredge spoils from the barge to trucks.

Give me a call at your convenience,

Thanks,

Matt

Jenn:

Thursday is not a good day for me. The FM video call is scheduled for that day. Wednesday afternoon is better for me.

Ray has a conflict on Thursday afternoon. Does Wed at 2pm here at the main office work for you?

Sounds good, I assume meet at your office?

Thanks,

Matt
