Subject: RE: Aqua Ventus

Hi Todd-

I check-in with Beth Callahan regularly on the status of this project on updates from the applicant. Our latest update from them shows that a number of project components are still being analyzed and/or being revised, so designs are not complete yet. We believe they will be submitting application(s) to us this fall, but we don't have a specific timeframe from them yet. I think it would be premature to meet until we have a little bit more concrete data from them on their proposal.

Thanks.  
Mark

Hi, Mark. Please let me know when you have a some time to talk about the anticipated regulatory path and related timetable for the Aqua Ventus project.

Thanks,  
Todd
