

# MAINE

## Deepwater Offshore Wind Report

Funded by:

U.S. DEPARTMENT OF  
**ENERGY**

Authored by:

# Offshore Wind Feasibility Study

Compiled by: University of Maine and  
James W. Sewall Company

## Table of Contents

List of Tables .....	vi
List of Figures.....	ix
List of Contributing Organizations.....	xiii
List of Authors and Contributors .....	xiv
Acknowledgments.....	xvi
Executive Summary .....	xvii
<b>1.0</b> Introduction.....	1-1
1.1 Maine Deepwater Offshore Wind Plan – A National Electrification Model .....	1-1
1.2 UMaine <i>DeepCwind</i> Program Available to Help Developers Select Floating Technology .....	1-4
1.3 Maine Deepwater Offshore Wind Plan .....	1-5
<b>2.0</b> Regional Analysis Criteria.....	2-1
2.1 Met-ocean Conditions.....	2-1
2.2 Bathymetry.....	2-2
2.3 Environmental Resource Impacts .....	2-2
2.4 Distance to Coastline .....	2-3
2.5 Distance to Grid Interconnection .....	2-3
2.6 Constructability and Supply Chain .....	2-3
<b>3.0</b> Gulf of Maine Resource Information.....	3-1
3.1 Met-ocean Conditions.....	3-1
3.2 Wind Data .....	3-3
3.3 Wave Data.....	3-4

TABLE OF CONTENTS

3.4 Marine Growth.....3-6

3.5 Icing..... 3-10

3.6 Extreme Value Analysis of Wave Data..... 3-11

3.7 Bathymetry Data ..... 3-14

3.8 Marine Geology of the Maine Inner Continental Shelf ..... 3-19

3.9 Marine Geohazards ..... 3-21

3.9.1 Seafloor Gas ..... 3-21

3.9.2 Earthquakes..... 3-24

3.10 Surficial Sediments..... 3-24

3.10.1 USGS East Coast Sediment Texture Database (ECSTB2005) ..... 3-25

3.10.2 USGS Continental Margin Mapping Sediment Grain-Size (CONMAPSG).3-26

3.10.3 USGS Maine Inner Continental Shelf Sediment Data (BARNHARDT)..... 3-26

3.10.4 Maine Geological Survey Surficial Geology of the Maine Inner Continental Shelf..... 3-26

3.11 Offshore Wind Energy Geographic Information System Data Status and Updates ..... 3-27

**4.0 Electric Grid Interconnection.....4-1**

4.1 Interconnection Locations .....4-1

4.2 Connection Pre-Feasibility Study/Available Capacity .....4-6

4.2.1 Study Area .....4-6

4.2.2 Steady-state Analysis Results..... 4-11

4.3 Grid Improvements and Interconnection Costs..... 4-18

4.3.1 Grid Improvements..... 4-18

4.3.2 Interconnection Costs ..... 4-18

4.4 Subsea Cable Feasibility (35km, 45 Km And 60km AC Cable) ..... 4-19

4.4.1 Subsea Alternating Current (A/C) Cable Selection ..... 4-19

4.4.2 Voltage Drop and Power Loss Calculations ..... 4-20

4.5 Large Offshore Wind Interconnections ..... 4-24

4.6 Offshore Cabling Assessment ..... 4-24

4.6.1 Key Coastal Forces ..... 4-24

4.6.2 Marine-based Anthropogenic Concerns ..... 4-29

4.6.3 Mitigation of Primary Hazards and Concerns – Trenching and Armoring...4-29

4.6.4 Cable-laying Techniques for Offshore Power Transmission..... 4-30

4.6.5 Recommended Coastal-Related Investigations to Support Cabling Design and Planning..... 4-32

4.6.6 Summary of Guidance and Constraints ..... 4-34

4.6.7 Environmental Concerns and Impacts ..... 4-36

4.6.8 Permitting Considerations for Interconnection Cable ..... 4-38

4.6.9 Summary Conclusions of Guidance ..... 4-41

**5.0** Impact Assessment.....5-1

5.1 Permitting.....5-1

5.1.1 State Permits and Approvals .....5-2

5.1.2 Federal Permits, Leases and Approvals .....5-9

5.1.3 Municipal and Local Approvals..... 5-16

5.1.4 State and Municipal Approvals..... 5-17

5.1.5 Permitting of Onshore Assembly and Staging Area ..... 5-17

5.1.6 Key Statutory Definitions Related to Offshore Wind Energy..... 5-20

5.1.7 Application Schedule..... 5-22

5.2 Physical Environment and Infrastructure Characterization..... 5-22

5.2.1 Jurisdictional Boundaries ..... 5-24

5.2.2 Wind Resource ..... 5-24

5.2.3 Met-ocean Data ..... 5-26

5.2.4 Bathymetry ..... 5-27

5.2.5 Topography..... 5-27

5.2.6 Geophysical Survey Data and Surficial Bottom Sediments..... 5-28

5.2.7 Wetlands and Coastal Marshland ..... 5-28

5.2.8 Grid Interconnection Points ..... 5-31

5.2.9 Subsea Cable Routes..... 5-31

5.2.10 Military Activity/Restricted Zones ..... 5-31

5.2.11 Shipping Lanes and Ferry Routes ..... 5-32

5.2.12 Coastal Wildlife and Migratory Marine Species ..... 5-35

5.2.13 Economic and Extractive Resources..... 5-35

5.2.14 Cultural and Archaeological Resources..... 5-36

5.2.15 Recreational Uses ..... 5-42

5.2.16 Necessary Additional Surveys..... 5-42

5.3 Environmental Considerations..... 5-44

5.3.1 Introduction of Environmental Considerations..... 5-44

5.3.2 Physical Environmental and Large-Scale Biogeography ..... 5-46

5.3.3 Species Groups of Potential Concern in Considered Areas..... 5-49

5.3.4 Physical Interaction with Turbines, Platforms, Cables and Anchors ..... 5-63

5.3.5 Alteration of Benthic, Demersal and Pelagic Habitats and Species..... 5-68

5.3.6 Acoustic Effects of Turbines and Other System Components ..... 5-70

5.3.7 Electromagnetic Field Effects ..... 5-72

5.3.8 Potential Risks and Recommended Studies ..... 5-73

5.4 Environmental Stakeholders..... 5-75

5.4.1 Introduction to Environmental Stakeholders ..... 5-76

5.4.2 Summary of Major Current Human Uses..... 5-78

5.4.3 Common Priority Questions, Concerns and Attitudes across Key Stakeholder Groups..... 5-107

**6.0** Construction and Assembly .....6-1

6.1 Summary.....6-1

6.1.1 Facilities .....6-1

6.1.2 Assembly and Deployment .....6-1

6.1.3 Companies with Expertise.....6-1

6.1.4 Equipment.....6-2

## TABLE OF CONTENTS

6.1.5	Maritime Skills and Heritage .....	6-2
6.1.6	Support Industries.....	6-2
6.2	Landside Storage and Assembly Facilities/Sites .....	6-2
6.2.1	Searsport Terminal at Mack Point .....	6-2
6.2.2	Sears Island.....	6-4
6.2.3	Brewer, Eastern Manufacturing Facility.....	6-4
6.2.4	Belfast.....	6-4
6.2.5	Bucksport.....	6-5
6.2.6	Rockland Harbor.....	6-5
6.2.7	Other coastal support facilities .....	6-5
6.3	Marine Assembly Area .....	6-5
6.4	Community, Social, and Environmental Partners.....	6-6
6.5	Local Service Provider Capabilities .....	6-6
6.5.1	Cianbro.....	6-6
6.5.2	General Dynamics, Bath Iron Works .....	6-10
6.5.3	Reed & Reed .....	6-11
6.5.4	Prock Marine.....	6-12
6.6	Additional Crane Sources and Availability .....	6-12
6.6.1	Additional Barge, Vessel and Tug Sources and Availability .....	6-13
6.6.2	Special Requirement Vessels and Equipment .....	6-14
<b>7.0</b>	<b>Economics and Policy.....</b>	<b>7-1</b>
7.1	Maine Public Utilities Commission Request for Proposals.....	7-1
7.1.1	Basic Requirements of RFP and Subsequent Power Purchase Contract .....	7-2
7.1.2	Price Mitigation and Rate Impact Limitation.....	7-3
7.2	Overview of New England Energy Markets.....	7-3
7.2.1	Market Overview.....	7-3
7.2.2	Energy and Capacity Markets .....	7-11
7.2.3	Transmission .....	7-13
7.2.4	Renewable Portfolio Standards.....	7-16
7.2.5	Power Market Forecast and Key Drivers .....	7-26
7.3	Maritime Cabotage Laws .....	7-32
7.3.1	Introduction .....	7-32
7.3.2	Cabotage and Coastwise Laws .....	7-33
7.3.3	Keeping a Weather Eye: Recent, Ongoing, and Potential Near- Future Developments in the Law .....	7-48
7.3.4	Conclusion.....	7-50
<b>8.0</b>	<b>Findings .....</b>	<b>8-52</b>
8.1	Regional Analysis Criteria.....	8-52
8.1.1	Met-ocean Conditions/Wind Resource .....	8-54
8.1.2	Bathymetry .....	8-54
8.1.3	Distance to Coastline.....	8-54
8.1.4	Environmental Resource Impacts.....	8-54
8.1.5	Distance to Grid Interconnection.....	8-54

TABLE OF CONTENTS

8.1.6 Constructability and Supply Chain..... 8-55

8.2 Evaluation and Development of Floating Platform Designs by the University of Maine ..... 8-56

8.3 Critical Issues..... 8-56

8.4 Permitting Considerations..... 8-60

**9.0** References .....9-1

9.1 References for Section 3.0.....9-1

9.2 References for Section 4.0.....9-3

9.3 References for Section 5.0.....9-5

9.4 References for Section 7.0..... 9-10

9.5 References for Section 8.0..... 9-10

**10.0** Appendices..... 10-1

10.1 Appendix A – Gulf of Maine Resource Supplemental Information ..... 10-1

10.1.1 Appendix A.1 – Journal Articles ..... 10-1

10.1.2 Appendix A.2 – Surficial Geology of the Maine Inner Continental Shelf Maps ..... 10-2

10.1.3 Appendix A.3 – Offshore Wind Energy Geographic Information System Development and Reference Information ..... 10-3

10.2 Appendix B – Impact Assessment Supplemental Information..... 10-4

10.2.1 Appendix B.1 – Buoy Data Summary (Wind and Wave)..... 10-4

10.2.2 Appendix B.2 – Important Bird Areas of Maine (Gallo et al., 2008) ..... 10-5

10.3 Appendix C – Substation Diagrams ..... 10-6

10.3.1 Appendix C.1 – Substation Diagrams ..... 10-6

10.3.2 Appendix C.2 – Subsea Cable Data Sheets ..... 10-7

10.4 Appendix D – Construction and Assembly Supplemental Information ..... 10-8

10.4.1 Appendix D.1 – Offshore Wind Supplier List..... 10-8

10.5 Appendix E – Maine Public Utilities Commission RFP Documents ..... 10-9

10.5.1 Appendix E.1 – An Act To Implement the Recommendations of the Governor’s Ocean Energy Task Force (LD1810)..... 10-9

10.5.2 Appendix E.2 – Maine Public Utilities Commission RFP..... 10-10

10.5.3 Appendix E.3 – Rate Impact Limitation..... 10-11

10.5.4 Appendix E.4 – Experience Requirement Supplemental Information ..... 10-12

10.5.5 Appendix E.5 – Security Deposit Process..... 10-13

10.6 Appendix F – Units of Measure and Acryonyms ..... 10-14

10.6.1 Appendix F.1 – Units of Measure..... 10-14

10.6.2 Appendix F.2 – Acryonyms ..... 10-15

# Offshore Wind Feasibility Study

Compiled by: University of Maine and  
James W. Sewall Company

## List of Tables

Table 3-1: Met-ocean data sites analyzed for the feasibility study .....	3-2
Table 3-2: Surface roughness lengths ( $z_0$ ) and the wind shear exponent ( $\alpha$ ) (after Manwell et al. 2002; Gipe, 2004; Wizelius, 2007).....	3-3
Table 3-3: Estimated 8-minute average monthly wind speed (m/s) (estimated) at 65 m height .....	3-4
Table 3-4: Average monthly maximum significant wave heights (m) .....	3-5
Table 3-5: Extreme significant wave heights (m) and return periods (years).....	3-5
Table 3-6: Attachment density of three common sedentary marine organisms at Lamoine, Maine, from 2 June – 25 September 1944 (Fuller et al., 1946) .....	3-9
Table 3-7: Superstructure icing potential frequency (percent) at 43° – 44° N, 69° – 70° W, (Godshall, 1980) .....	3-11
Table 3-8: Ice accumulation for vessels (Overland et al., 1986).....	3-11
Table 3-9: Extreme wave height prediction for Buoy E01 .....	3-12
Table 3-10: Extreme wave height prediction for Buoy F01.....	3-12
Table 3-11: Extreme wave height prediction for NDBC Buoy 44005.....	3-13
Table 3-12: Extreme wave height prediction for NDBC Buoy 44007.....	3-13
Table 3-13: Tidal statistics for Rockland, Maine (based on NOAA National Ocean Service benchmark tables).....	3-15
Table 3-14: Surficial sediment dataset summary.....	3-25
Table 3-15: OWEGIS Data Content and Status (October 2008 to March 2009).....	3-29
Table 4-1: Potential interconnection locations by County.....	4-1
Table 4-2: Interconnection locations for Area No. 1 (Projects 30 MW or less) .....	4-3
Table 4-3: Additional interconnection locations for Area No. 1 (15 MW or less).....	4-4
Table 4-4: Interconnection locations for Area No. 2 (Projects 30 MW or less) .....	4-4

LIST OF TABLES

Table 4-5: Additional interconnection locations for Area No. 2 (15 MW or less).....4-5

Table 4-6: Potential interconnection locations for Area No. 3 .....4-5

Table 4-7: Potential interconnection locations for Area No. 4 .....4-5

Table 4-8: Substation facilities evaluated in the pre-feasibility study for a 30 MW  
or less interconnection .....4-7

Table 4-9: Substation facilities evaluated in the pre-feasibility study for a 15 MW  
or less interconnection .....4-7

Table 4-10: Steady-state voltage criteria ..... 4-10

Table 4-11: Steady-state thermal criteria ..... 4-11

Table 4-12: Summary results of the steady-state analysis on the injection of 30 MW wind-  
generated energy at various interconnection points ..... 4-12

Table 4-13: Summary results of the steady-state analysis on the injection of 15 MW wind-  
generated energy at various interconnection points ..... 4-16

Table 4-14: Interconnection costs for a 30 MW wind energy project..... 4-18

Table 4-15: Tidal Statistics for Portland and Bar Harbor, Maine (based on NOAA National  
Ocean Service benchmark tables)..... 4-27

Table 4-16: Essential Fish Habitat designated species for Midcoast Maine..... 4-39

Table 5-1: Gulf of Maine (GoM) buoy data availability ..... 5-26

Table 5-2: Stakeholder concerns, questions, and priorities as relating to deepwater offshore  
wind energy in Maine..... 5-77

Table 5-3: Environmental Stakeholders – Commercial Fishing Contacts..... 5-91

Table 5-4: Environmental Stakeholders – Commercial Shipping Contacts ..... 5-93

Table 5-5: Environmental Stakeholders – Recreational Fishing Contacts ..... 5-94

Table 5-6: Environmental Stakeholders – Environmental/Conservation Contacts..... 5-103

Table 7-1: ISO-New England Historical and Weather Normalized Forecasted  
Demand (Source: Black & Veatch) ..... 7-10

Table 7-2: ISO-NE (Rest of Pool) Cleared Forward Capacity Market Prices  
(Source: ISO-NE)..... 7-12

Table 7-3: ISO-New England Import Capability (Source: ISO-NE)..... 7-14

Table 7-4: Renewable Portfolio Standards New England States Summary  
(Source: Black & Veatch) ..... 7-18

Table 7-5: Federal Renewable Portfolio Standards (Source: Black & Veatch) ..... 7-24

Table 7-6: Natural Gas Price Forecast (Source: Black & Veatch)..... 7-27

Table 7-7: Greenhouse Gas (GHG) Emission Allowance Forecast (Source: Black  
& Veatch)..... 7-28

Table 7-8: Electricity Price Forecast by Time of Day (TOD) ..... 7-29

LIST OF TABLES

Table 7-9: Capacity Price Forecast (CPF) ..... 7-31

Table 8-1: Wind Energy Development Regulatory Matrix (Maine Ocean Energy Task Force, 2009)..... 8-63

Table 8-2: Summary of Required Permits and Assessments for the Outer Continental Shelf (OCS) Wind Energy Development in Maine ..... 8-64

Table 8-3: Status of Existing Baseline Data for Environmental Permit Applications ..... 8-69

Table 8-4: Floating Offshore Wind Project Estimated Timeline -DRAFT ..... 8-70

# Offshore Wind Feasibility Study

Compiled by: University of Maine and  
 James W. Sewall Company

## List of Figures

Figure 1-1: The Maine Plan - A National Electrification Model.....	1-2
Figure 1-2: Maine Family Energy Costs - Transportation, Heating, and Electricity.....	1-3
Figure 1-3: A Five-Phase, 20-Year Plan for Deepwater Deployment off Maine's Coast.....	1-6
Figure 2-1: Screening criteria for offshore pilot project areas .....	2-5
Figure 3-1: Observational buoy network in the Gulf of Maine.....	3-1
Figure 3-2: Example prediction of extreme significant wave heights (Hs) for Buoy E01 using a Gumbel distribution .....	3-6
Figure 3-3: Buoy E01 summer bio-fouling (September 2006) .....	3-7
Figure 3-4: Buoy E01 summer bio-fouling close-up (September 2006) .....	3-7
Figure 3-5: Buoy E01 winter ice build-up (January 2004) .....	3-8
Figure 3-6: Buoy F01 early spring bio-fouling (April 2008).....	3-8
Figure 3-7: Locations of studies of marine growth in the Gulf of Maine .....	3-10
Figure 3-8: Gulf of Maine bathymetry and marine boundaries.....	3-16
Figure 3-9: Hydrographic survey vessel track (August 2010) .....	3-17
Figure 3-10: Measured depths (m) from August 2010 hydrographic survey.....	3-18
Figure 3-11: Central Maine inner continental shelf physical geology (after Kelley et al., 1998) .....	3-20
Figure 3-12: Combined bathymetric and seismic reflection data illustrating seafloor sediment layering and the pockmark surface features (Andrews et al., 2010).....	3-22
Figure 3-13: Maine shoreline with natural gas fields where gas only is shaded blue and black represents gas and pockmarks (Brothers et al., 2010, modified following Rogers et al., 2006) .....	3-23
Figure 4-1: Potential interconnection locations in Central Maine Power and Bangor Hydro service areas.....	4-2

Figure 4-2: General areas of interest for offshore wind project development .....	4-3
Figure 4-3: Connection pre-feasibility study substations (30 MW or less) .....	4-8
Figure 4-4: Connection pre-feasibility study substations (15 MW or less) .....	4-9
Figure 4-5: Voltage drop characteristics for 800 mm <sup>2</sup> cable .....	4-21
Figure 4-6: Kilowatt (kW) loss characteristics for 800 mm <sup>2</sup> cable .....	4-21
Figure 4-7: Voltage drop characteristics for 240 mm <sup>2</sup> cable .....	4-23
Figure 4-8: Kilowatt (kW) loss characteristics for 240 mm <sup>2</sup> cable .....	4-23
Figure 4-9: Cross-shore distribution of Shields Parameter ( $\psi$ ) under different wave conditions (Watanabe et al., 1991) .....	4-25
Figure 5-1: DeepCwind Consortium's Offshore Wind Energy Project Plan .....	5-1
Figure 5-2: Jurisdictional boundaries for coastal and international waters .....	5-23
Figure 5-3: Mean Annual Wind Speed (m/s) at 50 meter height above mean sea level .....	5-25
Figure 5-4: Gulf of Maine surficial bottom sediment distributions (after Poppe et al., 2005) .....	5-30
Figure 5-5: Restricted Areas and Coastal Hazards in the Gulf of Maine .....	5-33
Figure 5-6: Infrastructure and Transportation Features in the Gulf of Maine .....	5-34
Figure 5-7: Coastal Wildlife in the Gulf of Maine .....	5-37
Figure 5-8: Marine Migratory Animals of Concern in the Gulf of Maine .....	5-38
Figure 5-9: Coastal Economic and Extractive Resource Areas of Use in the Gulf of Maine .....	5-39
Figure 5-10: Cultural and Aesthetic Features in the Gulf of Maine .....	5-40
Figure 5-11: Recreational Uses of the Coastal Zone in the Gulf of Maine .....	5-43
Figure 5-12: LD 1810 Criteria for Deepwater Wind Energy Pilot Project .....	5-46
Figure 5-13: Gulf of Maine physioregions (from the Gulf of Maine Census of Marine Life). Note the outer boundary of the Northern Coastal Shelf is defined by the 100 meter depth contour .....	5-49
Figure 5-14: Whale Sighting Data (Right Whale Consortium) .....	5-52
Figure 5-15: Lobster population densities in Midcoast Maine (from Steneck and Wilson, 2001) .....	5-55
Figure 5-16: Catch per unit effort of pre-recruit lobsters in Midcoast Maine (from Steneck and Wilson, 2001) .....	5-56
Figure 5-17: Global distribution of cold-water corals (Freiwald et al., 2004) .....	5-57
Figure 5-18: The distribution pattern of the three most abundant Alcyonacea species in the Gulf of Maine (after Watling and Auster, 2005) .....	5-58

Figure 5-19: Deep-water coral species richness relative to the number of individuals encountered in the Gulf of Maine (modified from Auster, 2005) .....	5-59
Figure 5-20: (panel a) The Gulf of Maine's physioregions (from the Gulf of Maine Census of Marine Life), and spatial distributions of groundfish species (panels b – d) with coastal shelf and Georges Bank physioregion association, as compiled from NEFSC bottom trawl surveys from 1968 – 1996 (compiled by Collette and Klein-MacPhee, 2002; after Steneck and Wilson, 2010).....	5-60
Figure 5-21: Spatial distributions of groundfish species (a – d) with affinities to the central Gulf of Maine physioregion (after Steneck and Wilson, 2010).....	5-61
Figure 5-22: Summary results of Atlantic cod migrations in the Gulf of Maine for 2003 – 2007 (from Tallack, 2009) .....	5-62
Figure 5-23: Preliminary Maine commercial fishery landings by weight (left) and by value (right). Source: Maine Department of Marine Resources, 2010. ....	5-78
Figure 5-24: Commercial fishing areas identified through stakeholder interviews (groundfish trawl, shrimp trawl, lobster pot, hagfish barrel) from selected communities. Note major fishing harbors are currently not included on these maps. Information herein is proprietary; please request permission before duplicating or reproducing this material. (Source: Island Institute, Mapping Working Waters).....	5-80
Figure 5-25: Commercial fishing areas identified through stakeholder interviews (groundfish trawl, shrimp trawl, lobster pot, hagfish barrel) from selected communities. Darker areas represent places where there are more types of active commercial fishing. Note major fishing harbors are currently not included on these maps. Information herein is proprietary; please request permission before duplicating or reproducing this information (Source: Island Institute, Mapping Working Waters).....	5-81
Figure 5-26: Commercial shrimp trawl areas identified through stakeholder interviews from selected communities. Note major fishing harbors are currently not included on these maps. Information herein is proprietary; please request permission before duplicating or reproducing this material. (Source: Island Institute, Mapping Working Waters).....	5-82
Figure 5-27: Commercial lobster pot fishing areas identified through stakeholder interviews from selected communities. Note major fishing harbors are currently not included on these maps. Information herein is proprietary; please request permission before duplicating or reproducing this material. (Source: Island Institute, Mapping Working Waters).....	5-83
