

I. INTRODUCTION

The Maine Coastal Zone Management Program (“Maine Coastal Program”) was created by the State of Maine and approved by the National Oceanic and Atmospheric Administration (“NOAA”) in 1978, pursuant to the federal Coastal Zone Management Act of 1972 (“CZMA”). The Maine Department of Marine Resources (“DMR”) administers the program, which provides funding for policy initiatives, technical assistance, and enforcement of state laws that affect Maine’s coastal uses or resources.

A key component of this program is the authority of the State to review certain federal actions that affect coastal uses or resources to ensure that these activities are consistent with the Program’s “enforceable policies.” State land use and environmental laws approved by NOAA for inclusion in the Program serve as the core laws that provide Maine’s enforceable policies. This review process is generally known as “federal consistency review.”

This handbook is intended to help state and federal agencies, federal permit applicants, federal assistance applicants, and the public understand when federal consistency review is needed and how Maine conducts federal consistency reviews.

This guide is based on the federal regulations governing the federal consistency review process issued by NOAA.¹

Note: This guidance document describes the activities and authorizations subject to review for federal consistency pursuant to the State’s authority under the CZMA, and the core laws that contain the enforceable policies which apply to those activities. While this document is intended to act as a guide to the federal consistency review process, it should not be relied upon as a substitute for the federal regulations applicable to these review procedures. The reader is advised to refer to NOAA’s regulations governing the federal consistency review process which are referenced throughout this document and the federal Coastal Zone Management Act, 16 U.S.C. §1451 *et seq.*

II. THE MAINE COASTAL ZONE

Maine’s federally approved coastal zone extends from the inland boundary of all 147 coastal municipalities or unorganized townships or plantations that contain tidal waters

¹ See 15 Code of Federal Regulations (C.F.R.) Part 930 (2016).

seaward to the outer limit of the State's territorial ownership three nautical miles from the baseline from which the territorial sea is measured. Appendix B provides a map and list of the municipalities, and unorganized townships and plantations located in the Maine coastal zone. Only those federal actions that "may have reasonably foreseeable effects on any land or water use or natural resource" of Maine's CZMA-designated coastal zone are subject to federal consistency review. This may include federal actions that are conducted *outside* the coastal zone, but still affect any land or water use or natural resource of Maine's coastal zone.

All federally-owned properties are *excluded* from the coastal zone. However, federal actions on these properties that have reasonably foreseeable effects on any land or water use or natural resource of Maine's coastal zone *are* subject to a federal consistency review.

III. FEDERAL ACTIONS SUBJECT TO CONSISTENCY REVIEW

Federal actions subject to federal consistency review fall into the following four categories:

- ◆ Activities conducted or supported by any federal agency or any federal development project, whether within or outside the coastal zone, affecting any land or water use or natural resource of the coastal zone ("Federal Agency Activities"). *15 C.F.R. Part 930, Subpart C.*
- ◆ Activities proposed by non-federal applicants for which a federal license or permit is required that are in or in some cases outside the coastal zone, affecting any land or water use or natural resource of the coastal zone ("Federal License or Permit Activities"). *15 C.F.R. Part 930, Subpart D.*
- ◆ Activities described in any plan submitted to the Secretary of the Interior for the exploration or development of, or production from, any area, which has been leased under the Outer Continental Shelf Lands Act ("Outer Continental Shelf Plans"). *15 C.F.R. Part 930, Subpart E.*
- ◆ Activities that are the subject of applications for federal assistance under other federal programs submitted by state and local governments ("Federal Assistance Activities"). *15 C.F.R. Part 930, Subpart F.*

A. Federal Agency Activities²

1. Federal Agencies' Consistency Obligations

Generally, a federal agency undertaking an activity that the federal agency determines will affect any coastal use or resource must provide a consistency determination to DMR for review by the State. *15 C.F.R. §930.34(a)(1)*. A federal agency is required to meet this obligation regardless of whether a state has listed the activity in its coastal program if the activity has reasonably foreseeable coastal effects. The Maine Coastal Program currently lists the following as federal agency activities³ that, in the State's judgment, are matters for which a federal consistency determination is typically required:

- ❖ Army Corps of Engineers
 - ✓ proposed project authorization for dredging, channel works, breakwaters, other navigation works, erosion control structures, beach replenishment and dams
 - ✓ proposed acquisitions
- ❖ Department of Commerce
 - ✓ fisheries management proposals by National Marine Fisheries Service
- ❖ Department of the Interior
 - ✓ proposed National Park Service acquisitions
 - ✓ proposed U.S. Fish & Wildlife Service acquisitions
- ❖ Department of Defense
 - ✓ Location, and design of new or enlarged defense installations
- ❖ Department of Transportation
 - ✓ Location and design of new or enlarged Coast Guard stations, bases, and lighthouses, or maintenance or repair of such facilities
 - ✓ Location and design of aviation communication and air navigation facilities

² 15 C.F.R. §930.31 provides a detailed definition of the term "federal agency activity."

³ Maine Coastal Program document (Final Environmental Impact Statement, August 1978), Appendix E2, p. 295.

❖ General Services Administration

- ✓ Location design of proposed Federal government property acquisition and building construction
- ✓ disposal of surplus Federal lands

Note: As explained above, the responsible federal agency must submit a consistency determination for any federal agency activity that will affect any land or water use or natural resource of the Maine coastal zone. The foregoing list of federal agency activities is provided as an aid to federal agencies pursuant to 15 C.F.R. §930.34(b). DMR monitors unlisted federal activities and strongly encourages federal agencies to contact the Maine Coastal Program as early as possible in their project planning process to discuss potential federal consistency review requirements.

2. Negative Determinations

If a federal agency decides that its proposed activity will not have coastal effects, the federal agency must submit a “negative determination” to DMR in the following circumstances:

- ◆ the activity is one of the listed activities described in the subsection 1, above, or is an unlisted activity that DMR has identified on a case-by-case basis as an activity with potential coastal effects;
- ◆ the federal agency has prepared a consistency determination for the same or similar actions in the past; or
- ◆ the federal agency has undertaken a consistency assessment and developed initial findings on coastal effects. *15 C.F.R. §930.35(a).*

The federal agency must notify DMR of the basis for its negative determination at least 90 days prior to final federal approval of the activity. *15 C.F.R. §930.35(b), (c).* DMR encourages federal agencies to provide such notice as soon in the planning process as practicable. In the event of a disagreement, either party may seek mediation by the Secretary of Commerce or NOAA’s Office for Coastal Management (OCM). *15 C.F.R. §930.35(e) and Part 930, Subpart G.*

3. Environmentally Beneficial and Other Activities for which a Project-Specific Consistency Determination May Not Be Required. The State and a federal agency may agree to exclude an “environmentally beneficial” activity from federal consistency review. 15 C.F.R. §930.33(a)(4) (definition of “environmentally beneficial activities”). A federal agency which is planning an action that it thinks meets this definition and which is interested in this option should contact DMR, which will request that DEP and/or

other state agencies with jurisdiction over the relevant coastal resources evaluate the foreseeable coastal effects of the federal activity.

OCM's rules governing the federal consistency review process establish other specific procedures to facilitate federal-state coordination regarding actions that a federal agency expects would have insignificant direct or indirect coastal effects ("*de minimis* activities")⁴; phased consistency determinations where, for example, a development activity will be undertaken in discrete, related steps⁵; and general consistency determinations that address a repeated activity other than a development activity.⁶

B. Federal License or Permit Activities⁷

1. Listed License or Permit Activities

A federal license or permit, or other form of federal approval, certification, or authorization, listed below, for a proposal located within Maine's designated coastal zone may not be issued until the State concurs that the proposed activity is consistent with the enforceable policies of the Maine Coastal Program. For these listed activities⁸ occurring within the coastal zone, the State uses the same standards and procedures for evaluation of consistency as are used to evaluate license and permit applications under applicable state coastal management program core laws. Consideration of pertinent core law permit applications constitutes the State's consistency review, and approval of pertinent core law permits with attached conditions constitutes the State's consistency concurrence.

United States Army Corps of Engineers:

- Permit for discharges of dredged or fill materials in waters of the United States and their associated wetlands required under Section 404 of the Clean Water Act, 33 U.S.C. §1344.
- Permit for structures or work in or affecting navigable waters of the United States required under Section 10 of the Rivers and Harbors Act of 1899, 33 U.S.C. §403.

⁴ 15 C.F.R. §930.33(a)(3)

⁵ 15 C.F.R. §930.36(d)

⁶ 15 C.F.R. §930.36(c)

⁷ 15 C.F.R. §930.51 (defines the term "federal license or permit").

⁸ See Maine Coastal Program document, *supra*, pp. 296-7, and the routine program change approved by NOAA on October 25, 2005.

- Permit for transportation of dredged material for the purpose of dumping in ocean waters required under Section 103 of the Marine Protection, Research, and Sanctuaries Act (“Ocean Dumping Act”), 33 U.S.C. §1413.

Department of Homeland Security - United States Coast Guard:

- Permit for construction or modification of bridge structures across navigable waters of the United States under Section 9 of the Rivers and Harbors Act of 1899, 33 U.S.C. §401 and/or the General Bridge Act of 1946, 33 U.S.C. §525.
- Permit for a deep-water port under the Deepwater Port Act, 33 U.S.C. §§ 1501, *et seq.*

Environmental Protection Agency:

- National Pollution Discharge Elimination System (NPDES) permit⁹ under Section 402 of the Clean Water Act, 33 U.S.C. §§1342, *et seq.*
- Ocean dumping permit (authority exercised jointly with the United States Army Corps of Engineers) required under the Marine Protection, Research, and Sanctuaries Act (Ocean Dumping Act), 33 U.S.C. §1401, *et seq.*

Department of the Interior:

- Permits for pipeline rights of way for oil and gas transmission on the Outer Continental Shelf required under the Outer Continental Shelf Lands Act, 43 U.S.C. §§1334, *et seq.*

Department of Energy – Federal Energy Regulatory Commission:

- Licenses required for non-federal hydro-electric projects and associated transmission lines under Section 4(e) of the Federal Power Act, 16 U.S.C. §797e.
- Certificates authorizing construction, extension, acquisition or operation of pipelines, terminals or facilities for transportation or storage of natural gas for interstate commerce, under the Natural Gas Act, 15 U.S.C. §717b (Section 3) or §717f (Section 7).
- Permission and approval for the abandonment of natural gas pipeline facilities under Section 7(b) of the Natural Gas Act, 15 U.S.C. §717f(b).
- Authorization for importation of liquefied natural gas, under Section 3 of the Natural Gas Act, 15 U.S.C. §717b.

⁹ Note: NPDES permits issued by DEP under delegated authority are state actions not subject to federal consistency review.

Nuclear Regulatory Commission:

- License for construction and operation of a nuclear power plant, required under the Energy Reauthorization Act of 1974 and/or 10 CFR Part 52.

2. Unlisted License and Permit Activities

DMR, on behalf of the State, may also request a consistency review of a federal license or permit activity that is not listed under subsection 1, or, that is listed and occurs outside Maine's coastal zone or a "geographic location" described in Maine's federally approved coastal program, if the activity will have reasonably foreseeable coastal effects. *15 C.F.R. §§930.53(a)(2) and 930.54*. If OCM determines that the State has demonstrated that the proposed activity has reasonably foreseeable effects on Maine's coastal resources or uses, OCM must grant the State's request. Alternatively, a federal applicant may agree to subject its proposed activity to federal consistency review, in which case OCM's approval is not required. *15 C.F.R. §930.54(f)*.

C. Outer Continental Shelf (OCS) Plans

Federal license or permit activities described in detail within OCS plans are reviewed for consistency with the enforceable policies contained in the Maine Coastal Program. *15 C.F.R. Part 930, Subpart E*.

D. Federal Assistance Activities

Federal assistance activities that affect coastal uses or resources are subject to consistency review. *15 C.F.R. Part 930, Subpart F*. The term "federal assistance activities" means federal grants, contracts, loans, subsidies, guarantees, insurance, or other forms of financial aid provided to units of state or local government. *See 15 C.F.R. §§930.91 and 930.92*.

Note: Federal assistance activities covered by *15 C.F.R. Part 930, Subpart F* do not themselves typically trigger review under one of Maine's enforceable policies, which for the most part address construction-related activities, and thus in most cases do not require consistency review. Likewise, federal activities that involve provision of funding or other financial assistance to non-governmental entities or persons do not typically trigger review under one of Maine's enforceable policies or require consistency review. Federal agencies which are planning funding or financial assistance activities

for projects that are in or may affect Maine's coastal zone are encouraged to contact the Maine Coastal Program to discuss the need for consistency review.

IV. ENFORCEABLE POLICIES

A. State Core Laws Included in the Federal Consistency Review

As noted above, the CZMA requires certain federal actions affecting Maine's coastal uses or resources to be consistent with the "enforceable policies" contained in the Maine Coastal Program. *If an activity or effect is not addressed by one of the enforceable policies, the federal action is presumed to be consistent with the Maine Coastal Program, and a federal consistency review is not necessary.*

The enforceable policies of the Maine Coastal Program are contained within the state statutes and implementing rules listed in Appendix A. These statutes and rules are commonly referred to as the program's "core laws." In accordance with NOAA's CZMA rules, DMR periodically (usually following each legislative session) submits amendments or additions to the state core laws to OCM for its review and approval of them as changes to the MCP. Following OCM's approval, the revised state core laws, as applicable, may be used for federal consistency review.

DMR coordinates the consistency review process as necessary, serving as a single point of contact to receive requests for consistency reviews and to communicate with federal agencies and the public on consistency review issues and decisions. Applicants and federal agencies are strongly encouraged to consult with DMR to determine the applicable enforceable policies. Since most core laws are administered by DEP, DMR will commonly refer questions regarding whether a proposal triggers review under an enforceable policy(ies) to DEP, which in turn typically conducts the consistency review and makes the findings of fact and conclusions of law that serve as the basis for the state response to consistency determination or certification.

B. Standard of Review

Maine's consistency review process uses the same standards and, to the extent practicable, the same procedures used in processing license and permit applications under the core laws. A consistency objection by the State must cite and be based *directly* on a specific federally-approved enforceable policy or policies. *15 C.F.R. §§930.43(a) and*

930.63(b). State statutes and rules that are not included in Maine’s Coastal Program *cannot* be used as a basis for finding an activity inconsistent.

V. FEDERAL CONSISTENCY REVIEW PROCEDURE

A. Overview

The procedure for obtaining the State’s concurrence with a determination or certification that a federal action is consistent with applicable enforceable policies varies depending on the type of federal action described above. Sections B, C, D, and E of this part separately outline the process as it applies to federal agency activities, federal license or permit activities, OCS plans and federal assistance activities, respectively.

Maine strongly encourages early coordination regarding federal consistency review. The initial step for federal consistency review of any federal action should be to contact the federal consistency coordinator at DMR to inform the State of the proposed action. This early coordination will help answer questions concerning whether a review is necessary and the scope of the review. Typically, DMR will refer the federal agency or applicant to DEP to discuss whether and how enforceable policies apply to the proposed activity. If necessary, DMR will arrange a meeting at which the activity is discussed by the relevant state agency or agencies, again typically DEP, to identify and, whenever possible, to resolve any issues that are likely to arise when a formal consistency determination or certification is subsequently submitted.

B. Federal Agency Activities

The CZMA requires federal agency activities affecting Maine’s coastal uses or resources to be “consistent to the maximum extent practicable” with the enforceable policies contained in the Maine Coastal Program. The phrase “consistent to the maximum extent practicable” means “fully consistent with the enforceable policies of [a state’s approved coastal management program] unless full consistency is prohibited by existing law applicable to the Federal agency.” 15 C.F.R. §930.32(a)(1). “Accordingly, whenever legally permissible, federal agencies shall consider the enforceable policies of [state coastal] management programs as requirements to be adhered to in addition to existing Federal agency statutory mandates.” 15 C.F.R. §930.32(a)(2).

The State has 60 days to respond to a consistency determination. 15 C.F.R. §930.41. This review period begins when:

- ◆ the State receives a consistency determination; and
- ◆ the information supporting the determination is sufficient to perform the review. *See 15 C.F.R. §§930.39(a) and 930.41(a).* The State will notify the federal agency in writing within 14 days if it receives a consistency determination not accompanied with the supporting information required by *15 C.F.R. §930.39*.

The federal agency must grant one 15-day extension if requested by the State and may grant further extensions at its discretion. *15 C.F.R. §930.41(b)*. The federal agency may presume state concurrence with a consistency determination if the State does not respond within the 60-day time period. *15 C.F.R. §930.41(a)*. The State and the federal agency may agree to a longer review period. *15 C.F.R. §§930.41(b) and (c)*.

A final federal action may not be taken sooner than 90 days from the issuance of the consistency determination by the federal agency to the State, unless the State has concurred or is presumed to have concurred prior to that time, or unless otherwise agreed by both the federal agency and the State. *15 C.F.R. §§930.36(b)(1) and 930.41(c)*.

STEP	TIME
1. The federal agency sends a copy of its consistency determination, request for state review, and all supporting documents to DMR (“submission”). Note: Following consultation with DMR, the federal agency may submit all materials needed for consistency review directly to the lead review agency (usually DEP), provided that DMR receives, at a minimum, a copy of the consistency determination referencing materials separately submitted to the lead review agency. Electronic submissions via e-mail are acceptable and encouraged.	At least 90 days prior to final approval by the federal agency
2. DMR sends a copy of the submission to DEP and/or other appropriate agency(ies).	As soon as possible; as needed
3. The lead reviewing agency (typically DEP) checks the submission for completeness (consistency determination and supporting information required by <i>15 C.F.R. §930.39(a)</i>).	Within 14 days

If the submission is complete, the State’s review

begins and the 60-day time period starts when the submission was received.

If the submission is not complete, DMR, in consultation with the lead reviewing agency (typically DEP), will notify the federal agency in writing. *See 15 C.F.R. §930.41(a)*. The lead reviewing agency works with the federal agency and DMR, as needed, to address any information needs. The reviewing agency notifies DMR and the federal agency when the submission is complete and is accepted for review and the 60-day review period starts when the complete information was received by the State.

Note: As noted above, to the extent practicable, Maine uses the same procedures and standards used in processing state license and permit applications for review of federal consistency determinations. Consequently, even though the federal agency may not be required to follow state permit procedures and obtain a permit *per se*, information from federal agencies is often most conveniently and expeditiously submitted as a completed permit application. The State may request submission of additional information during the review period as needed to complete the consistency review.

4. If federal consistency review is required, the State will ensure publication of notice of the federal agency's consistency determination and opportunity for public comment in accordance with *15 C.F.R. §930.42*. In most cases, the public comment period will be no less than 14 days, although DEP and other review agencies may accept and consider comments received up to the issuance of its findings and decision regarding consistency. Usually within 30 days
5. The lead reviewing agency consults with other state agencies (such as the Maine Geological Survey (MGS), DMR, and the Department of Inland Fisheries and Wildlife (DIFW) as needed. If the agency requires Within 60 days

additional time to perform its review, it will notify DMR as soon as possible. In consultation with the lead reviewing agency, DMR will then request an extension from the federal agency.

6. The lead reviewing agency makes its decision regarding concurrence with or objection to the consistency determination and transmits that decision, typically in the form of a DEP order that grants or denies permit approval, to DMR. The order provides the factual findings and legal conclusions for the State's concurrence with or objection to the federal agency's consistency determination.
7. Based on the lead reviewing agency's findings and decision, DMR notifies the federal agency in writing of the State's concurrence with or objection to the consistency determination for the proposed federal activity. The state response typically incorporates by reference the pertinent DEP order.

If the State objects to a federal agency's consistency determination, DMR's notification will: (a) indicate the specific enforceable policy(ies) with which the proposed activity is inconsistent; (b) describe how it is inconsistent; and (c) indicate what time extension was granted by the federal agency, if the objection is issued beyond the 60-day review period. The notification may also identify alternative measures, if any, under which the activity could be found consistent. If the State's objection is based on a finding that the federal agency has failed to supply sufficient information, DMR will describe the nature of the requested information and why it is needed. *See 15 C.F.R. §930.43(b).*

Concurrent with Step 6

Within 90 days

8. DMR will notify the Director of OCM in all cases where the State objects to a federal agency's consistency determination. *15 C.F.R. §930.43(c).*
9. If the State and the federal agency cannot resolve any disagreements by the end of the 90-day period, the

State or the federal agency can attempt to resolve disagreements through mediation by the Secretary of Commerce or OCM. 15 C.F.R. §930, Subpart G.

Note: The above process applies to all federal agency actions (both listed and unlisted activities) for which a federal consistency determination and review are required.

C. Federal License or Permit Activities

A non-federal applicant for a federal license or permit (e.g., a private citizen, business entity, or state or local government unit) shall provide in the application to the authorizing federal agency a consistency certification in the following form:

“The proposed activity complies with the enforceable policies in the approved Maine Coastal Zone Management Program and will be conducted in a manner consistent with those policies.”

Most federal license or permit activities requiring a consistency certification (i.e., listed activities within the coastal zone) are subject to state and local permit requirements under the core laws that provide the enforceable policies used for federal consistency reviews and the permit applications provide the information needed to initiate review. The State’s CZMA consistency review is integrated into its process for review of pertinent state license or permit applications. *Consequently, in most instances, receipt of all the necessary state and municipal permits constitutes the State’s concurrence with the applicant’s consistency certification, and no further federal consistency review is required.* Pertinent state and local permitting processes provide opportunities for public notice and comment on the project’s consistency with applicable enforceable policies. Applicants for federal permits may wish to contact DMR regarding applicable federal consistency procedures and enforceable policies.

If no enforceable policy is applicable, then consistency with the Maine Coastal Program is presumed. Procedures for listed and unlisted activities are outlined below.

1. Listed Activities

STEP	TIME
1. For listed activities within the State’s coastal zone, the federal applicant includes in its application(s) a	At or near the time federal permit

certification that the proposed activity complies with and will be conducted consistently with the enforceable policies of the Maine Coastal Program. This certification, the federal application, and related information specified in 15 C.F.R. §930.58, and the applicable completed state and local permit applications required under the core laws listed in Appendix A constitute the necessary data and information for consistency review.¹⁰

application(s) are filed

Geographic Location Description. For listed activities that are outside the State’s coastal zone, the applicant must provide a consistency certification if the activity falls within the area of the Gulf of Maine, including Georges Bank, or on excluded federal lands within the coastal zone and submit the necessary data and information to demonstrate consistency, including the information specified in 15 C.F.R. §930.58 and the applicable completed state or local permit applications required for the proposed activity.¹¹ 15 C.F.R. §930.58; 15 C.F.R. §930.53.

In reviewing the certification and necessary data and information, the lead state agency (typically DEP) will make consistency findings based on the applicable enforceable policies using the same procedures and standards used in evaluating permit and license applications under the core laws.

The lead review agency will review the applicant’s submission for completeness and notify the applicant and federal agency in writing, within 30 days, if all necessary data and information has not been provided. The six-month review period begins when all necessary data and information has been received. The lead review agency may request additional information during the review period.

Within 30 days

¹⁰ Maine Coastal Program document, *supra*, p. 298

¹¹ Maine Coastal Program document, *supra*, p. 296

2. If the applicant receives the applicable state licenses and permits within six months of the applicant's submission of its consistency certification and all necessary data and information, the state licensed and permitted activity is deemed consistent with the enforceable policies of the Maine Coastal Program. On request and as it deems appropriate, DMR will respond directly to the permit applicant and/or federal agency that the State, in accordance with pertinent state licenses and permits, concurs that the proposed activity is consistent with the Maine Coastal Program. If the State does not object to the certification within six (6) months from the State's receipt of a complete consistency review request, the project is deemed consistent. In some instances, the State may condition its concurrence on receipt of all applicable permits.

Within six (6) months of receipt of a complete review application
3. The State and applicant for a federal license or permit may agree in writing to stay the six-month review period for a specified period of time. The agreement must specify the dates when the six-month review period began and was scheduled to end; the dates when the stay begins and ends; and the date when a decision on CZMA consistency is due. Such a stay may be appropriate to accommodate review of complex permits using state administrative processes.
4. If the State objects to an applicant's consistency determination, the applicant must receive DMR's objection letter within six (6) months from the State's receipt of a complete consistency review request or, alternatively, within the period agreed to by stay, as described in paragraph 3. DMR's objection letter must notify the federal agency and OCM of the State's decision. The objection letter must describe how the activity is inconsistent with specific enforceable policies in the Maine Coastal Program and may describe alternative measures (if they exist) that, if adopted, would permit the project to be conducted in

Within six (6) months of receipt of a complete application

a manner that is consistent with the enforceable policies. The letter shall also notify the applicant of its right to appeal the State's objection to the U.S. Secretary of Commerce who may override the State's objection if the Secretary finds that the project is consistent with the objectives of the CZMA or is otherwise necessary in the interest of national security. If the State objects to the consistency certification, the federal agency shall not issue the license or permit absent override of the State's objection by the Secretary of Commerce pursuant to *15 C.F.R. Part 930, Subpart H*. (See Appeal of a State Objection below.) *15 C.F.R. Part 930.64*.

2. Unlisted Activities

STEP	TIME
1. If the State wishes to review an unlisted federal license or permit activity, or a listed license or permit activity outside the coastal zone which requires OCM's approval pursuant to <i>15 C.F.R. §§930.53(a)(2) and 930.54</i> , DMR will notify the federal agency and the applicant that DMR intends to request approval from OCM to review the unlisted activity. <i>See 15 C.F.R. §930.54</i> .	Within 30 days of DMR's receipt of notice of the application filed with the federal agency
2. DMR notifies OCM that the State seeks to review the unlisted activity and provides support for the State's assertion that coastal effects are reasonably foreseeable.	Concurrent with Step 1
3. The federal agency and the applicant may submit comments to OCM regarding whether the State should be allowed to review the activity.	Within 15 days of DMR's notice to OCM
4. OCM will issue a decision to DMR, the federal agency and the applicant. OCM must base its decision solely on whether the proposed activity's coastal effects are reasonably foreseeable. <i>15 C.F.R. Part 930.54(C)</i> .	Within 30 days of DMR's notice to OCM

If OCM denies the request, the federal agency may issue the license or permit without consistency certification.

If OCM approves the request for review, the applicant must follow the same procedure for reviewing listed licenses or permits, above.

Note: A federal applicant may agree to subject its proposed activity to federal consistency review, in which case the OCM approval process outlined above is not required and the proposed activity is handled as a listed activity.

D. Outer Continental Shelf (OCS) Plans

The procedure for submitting a consistency certification for OCS plans is similar to the procedure for federal license or permit activities, outlined above. See *15 C.F.R. Part 930, subpart E* for details.

E. Federal Assistance Activities (assistance to state agencies and local government)

DMR and other coastal program agencies monitor federal assistance activities in the coastal zone and areas potentially affecting the State's coastal zone.

The State typically ensures that these activities are consistent with its enforceable policies through issuance of applicable licenses and permits, if and when the projects are later funded and undertaken. If earlier consistency review is needed, DMR will inform the federal agency and the applicant of the State's desire to conduct a consistency review within 30 days of receipt of notice of the proposed federal assistance action. In this case, consistency review of an application for federal assistance will be performed by the lead review agency (typically DEP) using the same procedures and standards used to evaluate permit and license applications to the extent practicable.

The applicant may appeal the State's consistency objection to the U.S. Secretary of Commerce pursuant to 15 C.F.R. Part 930, Subpart H. If the State objects to the consistency certification, the federal agency shall not provide funding for the activity until the State's objections have been satisfied or overridden on appeal to the Secretary of Commerce. *Id.*

F. Mediation

In the event of a disagreement between a federal agency and the State over consistency with the Maine Coastal Program, either party may seek mediation by OCM or the Secretary of the U.S. Department of Commerce. *15 C.F.R. Part 930, Subpart G.*

G. Appeal of a State Objection

As noted above, non-federal applicants for federal licenses, permits, or funding may appeal a state objection to the Secretary of the U.S. Department of Commerce. *15 C.F.R. Part 930, Subpart H.*
