

Table of Contents

1. INTRODUCTION	1
2. STUDY PURPOSE	5
3. EUROPEAN EXAMPLES.....	7
3.1 WindFloat Atlantic.....	7
3.2 Kincardine Phase 2	8
3.3 European Fabrication and Installation Methodology	8
3.4 Recommended Improvements	9
4. FLOATING OFFSHORE WIND PORT CRITERIA.....	10
4.1 General.....	10
4.2 Design Vessels and Required Draft.....	10
4.3 Vessel Clearances	11
4.4 Uplands and Quay Area	11
4.5 Loading Criteria	12
4.6 Air Draft.....	12
4.7 Length of Quay	12
4.8 Land-Based Crane Requirement	13
4.9 Distance to Installation Site	13
5. PROPOSED SITES.....	14
5.1 Mack Point Terminal	14
5.2 Sears Island.....	15
5.3 Sprague Put Parcel	16
5.4 GAC Chemical Site	17
6. INITIAL ANALYSIS / ELIMINATION OF TWO SITES	18
6.1 Sprague Put Parcel	18
6.2 GAC Chemical Site	18
7. SITE CHARACTERISTICS FOR REMAINING TWO SITES	20
7.1 Bathymetric and Geophysical.....	20
7.1.1 Mack Point Site	20
7.1.2 Sears Island Site	22
7.1.3 Results of Bathymetric and Geophysical Analysis	24
7.2 Geotechnical.....	24
7.2.1 Mack Point Soil Properties	24
7.2.2 Sears Island Soil Properties	25
7.3 Dredge Sediment Characteristics	26
7.4 FEMA Flood Level Designation	26
7.5 Topographic Information.....	28

7.6	Water Levels.....	28
8.	SITE LAYOUTS AND REQUIRED INFRASTRUCTURE.....	29
8.1	General Structural Considerations.....	29
8.2	Phased Approach.....	30
8.3	Sears Island Phase 1 Construction.....	30
8.4	Sears Island Phase 2 Construction.....	31
8.5	Mack Point Phase 1 Construction.....	31
8.6	Mack Point Phase 2 Construction.....	32
9.	VHB ENVIRONMENTAL ASSESSMENT BASED ON RECOMMENDED INFRASTRUCTURE.....	34
10.	COST ESTIMATING AND CONSTRUCTION SCHEDULES	35
10.1	General.....	35
10.2	Schedule Durations	35
10.2.1	Mack Point – Phase 1	35
10.2.2	Mack Point – Phase 2	35
10.2.3	Sears Island – Phase 1	35
10.2.4	Sears Island – Phase 2	35
10.3	Estimate Class and Accuracy.....	35
10.4	Methodology.....	36
10.5	Cost Estimation Scenarios	36
10.5.1	Mack Point – Phase 1	36
10.5.2	Mack Point – Phase 2	36
10.5.3	Sears Island – Phase 1	37
10.5.4	Sears Island – Phase 2	37
10.6	Assumptions and Considerations	37
10.7	Direct Costs	37
10.8	Indirect Costs.....	37
10.9	Contingency.....	38
11.	ASSESSMENT OF PROPOSED SITES.....	39
12.	PORT OF SEARSPORT OFFSHORE WIND HUB.....	40
13.	SEARS ISLAND CONSERVATION AREA POTENTIAL IMPROVEMENTS.....	42
14.	OFFSHORE WIND PORT COMMERCIAL ANALYSIS.....	45
14.1	Introduction	45
14.2	Project Pipeline and Implication on Port Infrastructure	46
14.3	Competitiveness of Floating Installations.....	50
14.4	Lease Agreements & Operating Model.....	54
14.4.1	The New Bedford Terminal, MA.....	54
14.4.2	State Pier, CT.....	55

14.4.3	Portsmouth Marine Terminal, VA & Dominion Energy.....	56
14.4.4	Tradepoint Atlantic, MD.....	56
14.4.5	Paulsboro, NJ.....	57
14.4.6	Operating Model.....	58
15.	RECOMMENDED NEXT STEPS.....	61
15.1	Site Investigations	61
15.1.1	Geotechnical Boring Program	61
15.1.2	Topographic Survey.....	61
15.1.3	Bathymetric Survey	61
15.1.4	Discussions with Utility Providers.....	61
15.2	Optimization of Design	61
15.3	Consultation and Permitting with State and Federal Resources and Regulatory Agencies	62
15.4	Outreach to Aqua Ventus Program at University of Maine	62
16.	PROJECT GEOTECHNICAL RISKS.....	63
16.1	Geotechnical Information.....	63
16.2	Predicted Soil Settlement Time Under Surcharge Program.....	63
16.3	Placement of Embankment Soils in Tidal Zone	63
17.	LIMITATIONS OF THIS REPORT.....	64

Appendices

Appendix A – Conceptual Drawings

Appendix B – Cost Estimates and Schedules
